Abstract

Technology is not just an aid for language learning but is rather an important medium of literacy in its own right language that we use for communication is very important. The importance of language skill in English needs to be viewed as a core value for technological upgradation. Use of English language skills has become vital for better learning and earning. Therefore it is necessary to teach English and develop English language skills among the professionals. To teach English and develop English language skills among the professionals various approaches and methods are in use in our country but most of them are traditional, less interesting ineffective as well as less motivating. So it is necessary to use modern approaches and tools of information and Communication Technology to develop better understanding and acquisition of basic skills of English language. With the significant development in information technology, the teaching of English language skill has gained a new dimension. The shift is from the structural to the communicative language teaching approach and equipping the learners with language skills that can be used effectively in professional and everyday life.

Key Words: Information, technological, upgradation, professional, approach

Introduction

Science and technology has been around us since the beginning of society, since primitive man used a stone and stick to create fire. Technology has evolved and developed substantially over many years and has changed the world greatly. Modern technology has enormous impact on society. It has led to much great advancements and improvements and undoubtedly society has benefited greatly from it. ever since the civilization there has been a visible impact of technology on every society. Each new invention affects how people relate to one another and how cultures have expanded or ended. Technology have impacts on people, cities,

countries and on all the fundamental aspects of our culture including language, art, health care, mobility, environment, religion, education etc.

The walk from the stone age to the computer age has been a long one and the journey itself has changed human beings in many ways, starting with their looks, habits, fashion, life styles etc. technology has become such a great part of our lives that we are connected to it every day such that it has become part and parcel of our lives. Nowadays we work, love, shop, play and communicate with each other and the world online^[1].

With the significant development in information technology, the teaching of English language skill has gained a new dimension. The shift is from the structural to the communicative language teaching approach and equipping the learners with language skills that can be used effectively in everyday life. There is a paradigm shift in the teaching of English language. Technology supported teaching and there is a big role of modern multimedia technology for developing proficiency in English.

Today the English classroom has pre-se morphed into a high-tech laboratory

Technology and English

Tools such as infographics, digital word walls and digital storytelling are all effective for building background, deepening understanding of language and content through multiple and varied interactions, and promoting collaboration and communication – all important indicators of EL's success in main stream class rooms.

English language skill laboratories are a veritable boon for the students and learners. They are amused animated and

Computers

This is the most important tool of information and communication technology and backbone of modern human life. Over head projector: it is an important tool of displaying information and processes to large number of people simultaneously. Lingua Phone: this tool is very important in language skill training of the trainers. Radio: it is very useful in education and training of the students of rural areas. Television :it is useful in

Technology in language learning

Technology in language learning transforms students from passive recipients to active learners and allows more profound and enriching linguistic

called the English language lab, and the English teacher has metamorphosed into a techno-savvy computer teacher. Days are gone when the teacher used to enter the classroom with a box of chalk pieces, a duster, book of grammar and the language exercises painfully dictated and dutifully noted by the students, it is indeed a thing of the past. And it is English teachers are still persisting with this they are dinosaurs in Jurassic park. They have not updated themselves with the new changes in English language skill teaching^[2].

excited now to explore at length. The new concepts that have been developed in the learning of the language. They can now learn at different rates of speeds, and now each students is given an opportunity to work at his/her own pace in a relaxed setting without competing with others in the classroom. Some of the important multimedia and applications used in the field of English language learning skills are:

education as well as entertainment of the people. It is found that it is helpful in developing listening skills useful in learning skills, useful in learning situational language as well as. Internet: it is the most important facility of communication. All the modern communication takes place through this. It has made the communication facility very fast, convenient, economic, and attractive.

immersion. Students can study their English course using a variety of comprehensive apps which are able to synchronize even without the internet. The

pronunciations all around the globe have been the same, more or less. The role of artificial intelligence, in recognising speech and making the correct corrections to it, it has made English a much easier language to speak and has led to more fluency.

With the mastery of English, the knowledge sharing, the connection and the opportunity for people to evolve and grow their ideas increases. It's no surprise that English has changed so much from its archaic form, so much so that it takes

Conclusion

With the advent of science and technology, it has left great impact on the society. As a matter of fact, we experience this effect in our daily lives. It has an effect on the growth of the economy, our culture, environment and our living standards. It is however important to note that the benefits of technology are a double-edged sword with some being detrimental and other being beneficial. On one end technology has made the life rich and easy but same is the case with the other side of its impact. Positive side, made the world a global village, vanishing all those barriers once were, but it has also negatively impinge the lives, the purpose of invention and appliances moved to negative direction.

We have embraced advanced of technology seeking only the benefits and completely ignoring the downfalls. The social impact of technology is huge because today we spend more time online than ever before and the internet plays a key role in various areas of our lives. There's no doubt that modern technology has facilitated our lives and establish communication with the world, but it also has many visible flaws. Thus technology

hours for an individual to understand what is written without outside help. However with technology being used by the masses, the language has been to change its form at a much faster pace, artificial intelligence and natural language processing technologies are being used to improve the quality of English language instruction. These technologies can provide personalized feedback and recommendations, enabling students to improve their language skills more efficiently^[3].

has its pros and cons. it has both good and bad affects on society. But when we speak of its impact on society as a whole. We only speak about the positive effects and tend to forget and overlook the negative aspects and effects of it. In fact the correct use of modern technologies require a comprehensive understanding to the reality of change that happens to the community. This requires concentrated efforts with full cooperation among all sectors of society to utilize the modern technologies accurately in order to ensure and protect the future generations. The modern age is termed as the era of knowledge explosion. The use of science and technology in the field of communication has revolutionized the whole world ICT is playing the most important and pivotal role in teaching learning process. It is also playing an important role in the learning of language especially English language skills. The use of ICT increases the scope of teaching and learning. It provides quality learning materials and creating autonomy of learning along with academic excellence students must have good English communicative skills for their prosperous future.
